

A Major project report on
DIGITAL PASSWORD-BASED CAR PARKING SYSTEM FOR APARTMENTS

submitted to

Jawaharlal Nehru Technological University, Hyderabad

in partial fulfillment of the requirement for

the award of degree of

BACHELOR OF TECHNOLOGY

in

ELECTRONICS & COMMUNICATION ENGINEERING

by

CHOWDARY JAYASREE - 196Y1A0427

ALLA DEEKSHITHA - 196Y1A0405

JAKKULA SUPRAJA - 196Y1A0449

LAKUM RASHMITHA - 196Y1A0460

Under the esteemed supervision of

Mrs. M. SABITHA

Assistant Professor, Department of ECE

CERTIFICATE

This is to certify that the major project entitled "**DIGITAL PASSWORD BASED CAR PARKING SYSTEM FOR APARTMENTS**" submitted to JNTUH is carried out by the following students of IV B. Tech in the partial fulfillment for the award of the B. Tech degree in Electronics and Communication Engineering during the academic year 2022-2023.

CHOWDARY JAYASREE - 196Y1A0427

ALLA DEEKSHITHA - 196Y1A0405

ABSTRACT

The smart parking system project main aim is to provide hassle-free car parking with the help of Arduino and IR sensors and a servo motor, we have built a 4-slot parking with an entry and exit gate.

The system consists of a 16x2 LCD at the entrance of the gate showing the information about the slots available. The system consists of two additional IR sensors at the entrance of the area for detecting a vehicle entering or leaving the parking area, hence whenever these IR sensors detect the car the gate gets open i.e. the SG90 servo motor is operated as a gate. Every uniform householder has their own unique password, which when they use to open the parking gate, then if the password is correct, the user will be prompted to enter the parking area and immediately the slot light will be turned on. If the user fails to enter the correct password, the alarm sound triggers, and the gate will not open.
