ABSTRACT

The Aim is to provide the solution on the current situation concerning the COVID-19 outbreak and the potential role of Internet of Things (IOT) as well as the associated technologies acting as the technological solution in mitigating the Outbreak.

As Social Distancing is the vital part in this present situation the distance Medicine (Telemedicine) is the major revolution that will be taking place in this World. This project includes the Smart Watch with the collaboration with the notification system attached to it.

This includes the measurement of heart beat, SP02 which will keep monitoring and updates and danger alerts are sent to the doctors and the ambulance.

This revolution will help many people without being contact to the other person physically (virtually connected). Hence, the COVID-19 outbreak and the positive cases and deaths will be reduced.
