

A
Major Project Report
On
**CRYPTCLOUD+: SECURE AND EXPRESSIVE DATA
ACCESS CONTROL FOR CLOUD STORAGE**

Submitted to
Jawaharlal Nehru Technological University, Hyderabad
in partial fulfillment of the requirement for the award of Degree of
Bachelor of Technology
in
Computer Science & Engineering
by

YADA. SRIVALLI	(196Y1A05B7)
PASUNURI. ESTHERA	(206Y5A0508)
SANA	(196Y1A0590)
UGGE. PALLAVI	(196Y1A05A6)

Under the guidance
of
Mrs. J.VEDIKA
Asst. Professor

ABSTRACT

Secure cloud storage, which is an emerging cloud service, is designed to protect the confidentiality of outsourced data but also to provide flexible data access for cloud users whose data is out of physical control. Ciphertext-Policy Attribute-Based Encryption (CP-ABE) is regarded as one of the most promising techniques that may be leveraged to secure the guarantee of the service. However, the use of CP-ABE may yield an inevitable security breach which is known as the misuse of access credential (i.e. decryption rights), due to the intrinsic “all-or-nothing” decryption feature of CP-ABE. In this project, we investigate the two main cases of access credential misuse: one is on the semi-trusted authority side, and the other is on the side of cloud user. To mitigate the misuse, we propose the first accountable authority and revocable CP-ABE based cloud storage system with white-box traceability and auditing, referred to as CryptCloud+. We also prove the security of our system and present the experimental results to demonstrate the utility of our system.

2.1	Building System	27
2.2	Proposed System	27
2.3	System Study	28
4	SYSTEM REQUIREMENTS	29
4.1	Hardware Requirements	10
4.2	Software Requirements	10
4.3	Functional Requirements	10
4.4	Non-Functional Requirements	11
5	SYSTEM IMPLEMENTATION	12
6	SYSTEM DESIGN	14
6.1	System Architecture	15
6.2	UML Diagrams	
6.3	Input and Output Design	
7	SOFTWARE REQUIREMENTS	
7.1	Java Technology	
7.2	Database Connectivity	
7.3	Networking
