

A
Major Project Report
on
**SECURE AND EFFICIENT PRIVACY PRESERVING PROVABLE
DATA POSSESSSION IN CLOUD STORAGE**

Submitted to
Jawaharlal Nehru Technological University, Hyderabad
in partial fulfilment of the requirements for the award of Degree of
Bachelor of Technology
in
Computer Science & Engineering

By
B.Divya 196Y1A0517
B.Navya 196Y1A0511
B.Ramya 196Y1A0507
B.Jyothi 196Y1A0505

Under the guidance
of

Dr.E.Sudharshan
Head of the CSE Department

Department of Computer Science & Engineering

SUMATHI REDDY INSTITUTE OF TECHNOLOGY for WOMEN

(Approved by AICTE, New Delhi; Affiliated to JNTU, Hyderabad)

ABSTRACT

Cloud computing is an emergent paradigm to provide reliable and resilient infrastructure enabling the users (data owners) to store their data and the data consumers (users) can access the data from cloud servers. This paradigm reduces storage and maintenance cost of the data owner. At the same time, the data owner loses the physical control and possession of data which leads to many security risks.

Therefore, auditing service to check data integrity in the cloud is essential. This issue has become a challenge as the possession of data needs to be verified while the privacy. To address these issues this work proposes a secure and efficient privacy preserving provable data possession (SEPDP). Further, we extend SEPDP to support multiple owners, data dynamics and batch verification. The most attractive feature of this scheme is that the auditor can verify the possession of data with low computational overhead.
