Major Project Report
On
**DUAL ACCESS CONTROL FOR CLOUD-BASED
DATA STORAGE AND SHARING**

Submitted to
Jawaharlal Nehru Technological University, Hyderabad
in partial fulfilment of the requirements for the award of Degree of

Bachelor of Technology
in
Computer Science and Engineering
By

LEKKALA PRAVALIKA	(196Y1A0558)
KANDARAPU SWATHI	(196Y1A0550)
EGA PRANATHI	(196Y1A0531)
BOJJA SOWMYA	(196Y1A0514)

Under the Guidance
of
Mr. M. MRUTHYUNJAYA
(Assistant Professor, CSE)

ABSTRACT

Cloud-based data storage service has drawn increasing interests from both academic and industry in the recent years due to its efficient and low cost management. Since it provides services in an open network, it is urgent for service providers to make use of secure data storage and sharing mechanism to ensure data confidentiality and service user privacy. To protect sensitive data from being compromised, the most widely used method is encryption. However, simply encrypting data (e.g., via AES) cannot fully address the practical need of data management. Besides, an effective access control over download request also needs to be considered so that Economic Denial of Sustainability (EDoS) attacks cannot be launched to hinder users from enjoying service. In this paper, we consider the dual access control, in the context of cloud-based storage, in the sense that we design a control mechanism over both data access and download request without loss of security and efficiency. Two dual access control systems are designed in this paper, where each of them is for a distinct designed setting. The security and experimental analysis for the systems are also presented.
