ABSTRACT

The Multi Control Banking Technique System Interface is targeted to the future banking solution for the users who is having multiple bank accounts in multiple banks. This interface integrates all existing banks and provides business solutions for both retail and corporate.

This system acts as a standard interface between the clients and all the banks, by using this portal any client who maintain accounts in various banks can directly log on to Multi Control Banking Technique System Interface and make any kind of transactions. In the backend, system will take care of the entire obligation required in order to carry on transaction smoothly.
